## PressClean-IQ

This PressClean-IQ wash cloth is made from highly absorbent wood pulp and PET which is joint together through a laminating spun laced process.

The PressClean-IQ wash cloth is made of a compact texture which is characterize of his softness, excellent liquid absorbency, excellent ink and paper dust cleaning capacity.

It is preferred cleaning material for the Printing industry, but can also be used in the Electronic and automotive industry.

<b>Innovation</b>	AtéCé a major global <b>washcloth converter</b> leads the industry with innovative washcloth developments. Our commitment is to continue developing and delivering innovative products that improve quality and printing time on press.
<b>Technology</b>	PressClean Washcloth are being produced with the most advanced production technique available and is the next generation in Washcloths.
<b>Reliability</b>	The consistency and quality of our new Washcloths and improved control gives a superior result on press. <b>PressClean-IQ is FOGRA approved!</b>
<b>Value</b>	Improvements provided by PressClean improving production time and reducing down-times on press.
<b>Ecology</b>	PressClean Washcloths are another innovation from AtéCé Graphic Products.
