PrintGuard®

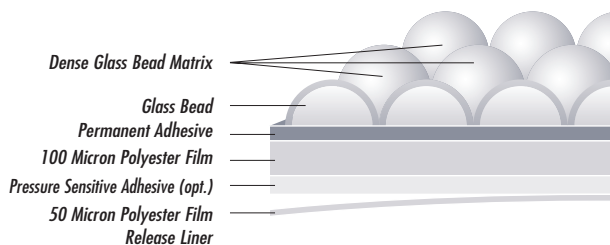

Manufacturer of
Glass Bead Film
AntiMarking Products

PrintGuard anti-marking products are manufactured on our proprietary production line by positioning billions of uniform diameter glass beads in a precise dense glass bead matrix monolayer – the highest density per square area possible! We permanently bond them to film using custom formulated adhesive. PrintGuard's technology is guaranteed to improve your print quality and decrease your downtime.

PrintGuard Glass Bead Technology Stops Marking

● PrintGuard Regular = Semi-Transparent Glass Bead Film

PrintGuard Anti-Marking Sheets Are Available For All Presses:

Komori Akiyama	Mitsubishi Ryobi	Shinohara Hamada	Sakurai
-------------------	---------------------	---------------------	---------

...we can configure sheets for any press – Call us!
