

# Designed for Coater Transfers!

## CELEBRATING 45 YEARS OF INNOVATIVE HISTORY IN THE PRINTING INDUSTRY

PRI has spent more than 44 years of research, development and testing to create the most revolutionary, never ever wash, anti-marking cylinder jacket the world has ever seen.

There is no regular cleaning schedule for the Super WHITE Zebra+. However, over time, ink and other pressroom related debris can collect on its surface. Several passes over a dirty area with the Dry Clean Roller will remove any such debris quickly and easily, eliminating the use of any hazardous chemicals, rags or gloves.

- Premium Product for Special applications
- Recommended for Coating Transfers
- UV Compatible
- Mounts with Approved Heidelberg Hardware
- Complete with easy to use Dry Clean Roller

NEVER EVER WASH

# **SUPER WHITE™ ZEBRA+™**

*The ULTIMATE Anti-Marking Cylinder Jacket*
