

# AIR-Q™ Sanitization System

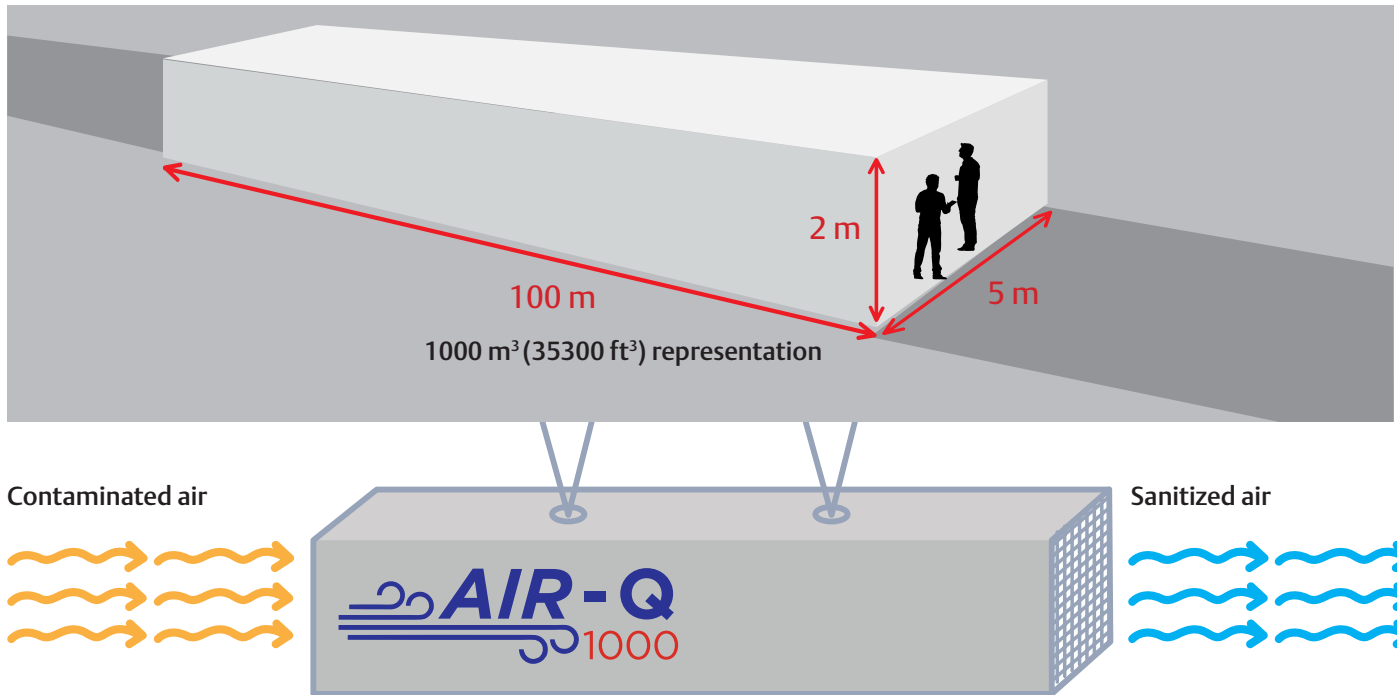

Destroy 99.9% of viruses and bacteria in the air around you  
Sanitize the air in your workplace, shop, canteen and rooms

# AIR-Q™ Sanitization System

Sanitize 150 cubic metres (5300 cubic feet) per hour

The Air-Q UV Sanitization system offers efficient, whole-room air sanitization for offices, canteens, restaurants, shops, hotel rooms and other enclosed spaces. Utilising our vast UV experience (dating back to the 1970's) and history of industrial UV-Disinfection and Sanitization applications. The Air-Q system is designed for ultimate performance in a quiet unobtrusive package, killing up to 99% of bugs which pass through it (including Influenza and Coronavirus, which causes COVID-19).

Utilising integrated light shielding and bespoke filter panels, the Air-Q system is safe to wall or ceiling mount in a populated space whilst being run 24/7. The 253.7nm UVC light produced by the Air-Q system destroys the molecular bonds that hold together the DNA of viral, bacterial and mold spores – killing the micro-organisms and rendering them harmless.

## Key Features

- Up to 99.9% Kill Rate - Including Influenza & Coronavirus
- Suitable for areas up to 1000 m<sup>3</sup> (35300 ft<sup>3</sup>)
- Bi-directional fan flow sanitizes the air in rooms 5x faster than other solutions
- Simple plug and play installation with domestic socket
- Sleek lightweight aluminium body
- Integrated shielding for optimum performance and safety
- Quiet and safe to leave running 24/7
- Ultra-Low energy consumption

## Technical Specification

Nominal Power:	311W nominal power
Air Flow:	150m <sup>3</sup> (5297ft <sup>3</sup> ) per hour
Compliance:	CE Certified
Lamps/Life:	3x 75W UVC / circa 9,000 hours
Weight:	11Kg
