Our Story

In 2003, with 50 years combined experience of printing consumables - Blueprint UK was born. Beginning with a team of two from home, Blueprint UK sought to do business well. Our biggest selling point was - and still is - quality products, impeccable service, and ongoing support and relationship.

From the start we had an eye on the potential of quality Anti-Marking products for the, then booming, Sheetfed Offset market. Blueprint UK acquired European agency for Super Blue nets from PRI and well respected glass bead films as the core of what we offered. Our successful introduction of innovative products saw our sales increase, and so too did our team and product range to match.

We are now equipping printers with metal impression jackets, replacement UV Curing Lamps and this catalogue of other consumables around the world.

Blueprint's profile continued to expand across the world - exhibiting at every Drupa and IPEX since 2004. We become a global brand with sales, contacts and friends in every continent. We are grateful and amazed at what has grown from such humble beginnings.

Our goal has always been bigger than ourselves, though. Blueprint UK strive to share our success with individuals and charities in order to further develop our local community and encourage those that seek to make a difference.

Our name stems from the idea that blueprints were unfolding before us. We think they still are today and so our business continues to evolve. You are welcome to join us on our journey.

Blueprint UK at Drupa 2016 as Social Media Champions
